Brand Strategy.

Brand Strategy.

Our Brand Strategy aligns everything we stand for - as a firm, as partners, and as builders. It sets the direction for every decision we make and every story we tell, ensuring that what we put out into the world reflects who we truly are.

Strategic Framework.

Our Vision & Mission.

● VISION

To accelerate India's evolution into a Product Nation by backing deep tech founders solving problems that matter globally.

● MISSION

To be a day one partner for founders, committing capital, conviction and long-haul support to build enduring companies that deliver returns for all stakeholders.

Our Approach.

Mentor Capitalism. Capital is just the beginning. Most investors write cheques. We stay for the work.

Capital gets you in the room. What happens after that the hiring decisions, the market calls, the hard conversations is where companies are actually built. That's what we mean by Mentor Capitalism. Not a philosophy. How we show up every day.

Our Beliefs.

01

Founders lead, we partner alongside.

We work alongside founders through the hard parts, bringing what’s needed, stepping back when it isn’t.

The company is built by the founder. Our role is to support the work, not replace it.

Our Beliefs.

02

Societal impact and investor returns are not a tradeoff. They're the same bet.

We've backed companies solving problems in sanitation, rural healthcare and financial access and they've built the most defensible positions in our portfolio. When you solve something that genuinely matters, customers don't leave and markets don't disappear. That's not impact investing. That's just good investing.

Bharat first investment lens.

We invest with a Bharat-first lens. The constraints our founders navigate — infrastructure gaps, price sensitivity, fragmented markets aren't obstacles. They're the innovation.

Our Beliefs.

04

The best companies are built on the right timeline, not the fastest one.

Not every company builds at the same pace. We move with urgency where it matters and hold firm where the work demands patience.

Our Beliefs.

05

Deeply ingrained in India,
international in thinking.

We operate with a global mindset while being deeply ingrained in India. Our founders build from Indian realities but think and compete on a global scale.

Value Proposition.		
	01 We decide early. We don't wait for perfect signals or polished pitches. We back founders early, based on how they think, build and approach the problem.	02 We stay in for the long term. Building takes time, and we plan for it. We move with speed where it matters, and stay invested long enough to see the company through.
	03 We focus on making it work. The hardest part is not the idea. It's making it work. We bring in the right operators, researchers, & domain experts to help founders solve problems as the company takes shape.	04 We connect you to markets and capital. Great companies are built in context, but they have to be understood beyond it. We support founders across India, not just from the obvious places and help them access markets, capital and partnerships
	05 We say it as it is. We don't perform knowledge or avoid hard conversations. We are direct, honest, and focused on what actually helps the company move forward.	06 We understand what founders carry. Building in India is never just a business — it's a life's work. We've been in the trenches long enough to know the personal cost. We're the first call when things go wrong, and we stay on the line until it's fixed.
VALUE PROPOSITION		13

Core Personality.

Unicorn VC is founder-first, and shaped by an engineering way of thinking.

It approaches company-building by breaking problems down, focusing on what needs to be built and working through complexity without over-structuring it.

It is rooted in India, with a clear understanding of how constraints shape both technology and business and equally clear on how those companies need to stand beyond it.

It takes a long-term view of the capital, without slowing decisions or execution.

Core Personality.		
01	Founder-aligned.	We don't wait for perfect signals or polished pitches. We back founders early, based on how they think, build and approach the problem.
02	Engineering-minded.	We back founders solving hard problems and we engage with the depth those problems require. We don't invest in what we can't understand.
03	Deeply involved.	We don't sit on the sidelines between board meetings. We're in the work, on hiring, on market access, on the hard calls that don't wait for a quarterly update.
04	Long-term by design.	We take a long view on building and on capital. We move fast where it matters and stay patient where it doesn't.
05	Grounded, not trend-led.	We are rooted in India's reality. We don't chase cycles or back what's fashionable. We back what's necessary.
CORE PERSONALITY		15

Brand Voice
& Tone.

Investor mindset.
Operator approach.

Unicorn writes like someone who has backed companies and built inside them. Not to impress. Not to predict. To understand what's being built and what it takes to make it real.

01

Observational, not declarative.

We don't announce the future. We describe what we're already seeing take shape. The tone isn't trying to be right. It's trying to be accurate.

 Deep tech will reshape every industry in India.

 Founders are solving problems in sanitation, rural healthcare and semiconductor design that weren't considered investable five years ago.

Experience-led, not idea-led.

We don't start with concepts. We start with what building actually demands. The tone carries the weight of having been inside the process.

 We invest in breakthrough technologies.

 The hardest part is never the idea. It's finding the first customer in a market that doesn't know it needs you yet.

Specific, not symbolic.

We don't rely on big words to create meaning. We make meaning clear through specificity. The tone removes interpretation. It doesn't ask the reader to fill in gaps.

 We support innovation across sectors.

 We work with founders building in semiconductors, space infrastructure and rural healthtech.

Steady, not performative.

We don't shift tone to create urgency or importance. We show up the same way regardless of the moment. Trust comes from consistency, not volume.

 This is India's defining moment.

 India's deep tech ecosystem is early. Most of the work is still ahead.

Our Manifesto.

Builders of Indian deep tech.

We've seen how this usually goes.

A strong idea.
A compelling pitch.
Early excitement.

And then the real work begins.

The part where things don't line up easily.
Where the market isn't fully shaped.
Where the team is still coming together.
And the company has to be built around the technology.

That's the part we pay attention to.

Not just what is being built, but who is building it.
Whether they stay with the problem long enough to solve it.
Whether they can turn something complex into something that works.

We don't wait for perfect signals.
We decide based on judgment.

And once we commit, we stay close to the work.

Sometimes that means stepping in.
Sometimes it means helping shape the company.
Sometimes it means simply not walking away.

Because building in deep tech takes time.
And building in India takes its own kind of resilience.

A lot of what works here is figured out in the process
Not borrowed. Not assumed.

We back Indian deep tech before it becomes obvious.
And we build alongside founders until it becomes real.

Messaging Examples.

Build what others can't place.

We back founders building through complex engineering problems and work with them to turn that into companies that reach the markets they're meant for.

01 The idea is not the hard part. Making it hold is.

02 Some technologies are clear long before their place in the market is.

03 Early validation tells you it can work. It doesn't tell you how far it goes.

04 There are parts of the journey where things move fast, and long stretches where they don't. Both matter.

05 A lot of what gets built here comes from constraint, not from copying what already exists.

06 Where something starts from is one context. Where it needs to stand is another.

07 You can't model everything easy. Some things only become clear once you're in it.

Messaging Rules.

Consistency is key.

Here are a few rules to help keep the voice stay consistent.

- 01

Don't start with the future. Start with the reality.

Avoid: Leading with big outcomes or predictions.

Use: Start from what is happening today → then build toward what it could become.

DON'T LEAD WITH PREDICTIONS. ANCHOR IN REALITY FIRST.

- 02

Don't explain the idea. Explain what it takes.

Avoid: Describing the technology or vision at a high level.

Use: Focus on what is required to make it work.

MOVE FROM CONCEPT → EXECUTION.

- 03

Don't generalise. Be precise.

Avoid: We support innovation across sectors.

Use: Name the space, the challenge, or the stage.

SPECIFICITY BUILDS CREDIBILITY.

Messaging Rules.

Consistency is key.

Here are a few rules to help keep the voice stay consistent.

04 Don't perform insight. State it.

Avoid: Over-explaining or layering language.

Use: Say the point once, clearly.

IF THE READER HAS TO DECODE IT, IT'S WRONG.

05 Don't overstate your role.

Avoid: "We enable", "we drive", "we transform".

Use: Show what you actually do.

LET BEHAVIOUR SPEAK.

06 Don't write for effect. Write for use.

Avoid: Lines that sound good but can't be reused.

Use: Lines that can appear in:

- A deck
- A post
- A conversation

IF IT ONLY WORKS ONCE, IT DOESN'T BELONG.

Logo System.

Logo System.

A brand guideline is a crucial document that serves as a comprehensive reference for maintaining consistency and coherence in a brand's identity and elements.

Primary Logo Unit.

Our logo system unites geometric precision and organic ambition in a mark that embodies collaborative, tech-forward venture building.

The unicorn's horn breaking beyond the rounded frame symbolises founders and investors who co-build beyond boundaries, with transparency at the core.

Deep navy and clean white speak to trust, clarity, and an intelligent partnership between capital and innovation.

📄 [DOWNLOAD LOGO LOCK-UPS](#)

Unicorn
INDIA VENTURES

Logo in Different Sizes.

Our logo has been designed to work across sizes. Here are some examples.

ON SCREEN: 560 x 168 px
ON PRINT: 148 x 44 mm

ON SCREEN: 420 x 126 px
ON PRINT: 111 x 33 mm

ON SCREEN: 350 x 105 px
ON PRINT: 93 x 28 mm

ON SCREEN: 270 x 81 px
ON PRINT: 19 x 21 mm

ON SCREEN: 150 x 45 px
ON PRINT: 150 x 12 mm

Logo Clearspace.

While using the logo in communication or any media, it is to be placed with clear space around it to make it legible and breathable. The ideal clear space to provide is to use the size of the logo symbol from the logo system.

This diagram shows the formula for creating the minimum margin of space around our logo.

Primary Wordmark with Background.

The logo system can be placed in white and blue, interchangeably in these situations.

Logo in Black & White

For situations where the background is black or white and a solid black or white logo needs to be placed.

Additional Lockups.

These are your supporting logos or lockups.
Used to support where your primary logo and
brandmark are unusable.

Social Media Icon.

The social media icon should be used for small formats. Do not use the social media icon treatments for large applications such as posters, banners or billboard advertisements.

PRIMARY ICON BLUE BACKGROUND

PRIMARY ICON WHITE BACKGROUND

Logo with Partner Logos.

These guidelines show how to create partner lockups. The space between logos is to be kept as the size of two “i” letters from the logo wordmark. Divide the two “i” of the logo wordmark in half and use each half on either side of the two logos.

When scaling logos in any format, accommodate for different shapes by scaling logos to appear optically equal.

Logo with Partner Logos.

These guidelines show how to create partner lockups. The space between logos is to be kept as the size of two “x” letters from the logo wordmark. Divide the two “x” of the logo wordmark in half and use each half on either side of the two logos.

When scaling logos in any format, accommodate for different shapes by scaling logos to appear optically equal.

Logo Minimum Size.

To ensure that the logo is legible in smaller sizes. Its minimum size, as mentioned by its height, is 16 px. An example is the favicon, where just the logo symbol has been used.

Do not scale the logo below this size.

 16 px on screen

Incorrect Logo Usage.

To maintain the visual integrity of our brand, avoid these instances while using the logo.

❌ DO NOT CHANGE OUR LOGO LOCKUP

❌ DO NOT USE UNAPPROVED COLOURWAYS

❌ DO NOT STRETCH OUR LOGO

❌ DO NOT DISTORT OUR LOGO

❌ DO NOT TILT OUR LOGO

❌ DO NOT ADD A STROKE TO OUR LOGO

❌ DON'T USE A WORDMARK BARRING THE ONES THAT HAVE BEEN SUGGESTED

❌ DO NOT APPLY EFFECTS TO OUR LOGO

❌ DO NOT USE MULTIPLE COLOURS

Brand Elements.

Brand Elements.

At the heart of Unicorn India Ventures lies carefully crafted brand elements. Each element has been thoughtfully designed to reflect the brand's essence and values.

⬇ [DOWNLOAD ALL THE BRAND ELEMENTS](#)

Shapes In Use.

Our core shapes are deliberately minimal and geometric, a precise counterbalance to the dimensional blue gradient. Where the gradient shifts with depth and luminosity, these structured forms bring technical clarity and purpose.

Each shape exists in three states: outline, stroke, and filled gradient – moving from placeholder to presence. Together, they become the visual language that transforms abstract metrics into tangible, impressive stories.

Circle

Diamond

Hexagon

Construction Guide - Circle.

The circle is built from a series of overlapping arcs, scaled progressively from a fixed center point. Each step refines the depth and dimensional quality of the form.

STEP 01

Begin with a base circle. Duplicate and offset each iteration along the horizontal axis, scaling progressively outward.

STEP 02

Establish the center anchor points. These reference nodes define the spacing rhythm between each overlapping form.

STEP 03

Apply the gradient fill to the leading form. The trailing outlines recede, creating the illusion of depth and forward motion.

Patterns & Illustrations - Circle.

Construction Guide- Diamond.

The diamond is constructed through stacked offset planes, radiating outward from a single vertical axis. This layering creates the shape's signature sense of perspective and motion.

STEP 01

Begin with the primary diamond. Stack and offset duplicates along the diagonal axis, each plane slightly smaller than the last.

STEP 02

Introduce the horizontal reference points. These anchors define the spatial intervals between each receding plane.

STEP 03

Fill the leading diamond with the gradient. The outlined planes behind it establish perspective and structural depth.

Patterns & Illustrations - Diamond.

Construction Guide- Hexagon.

The hexagon is derived from two intersecting lens forms, anchored by key reference points along the vertical axis. The overlap defines the final silhouette and gradient depth.

STEP 01

Begin with two overlapping lens forms aligned to a central vertical axis. Their intersection defines the core hexagonal silhouette.

STEP 02

Establish reference points at key intersections. These nodes map the boundary relationships between the two forms.

STEP 03

Apply the gradient fill to the primary form. The secondary outline recedes to reveal the shape's constructed geometry.

Patterns & Illustrations - Hexagon.

Icon Style Guide.

All icons use a consistent circular outline frame with a 2.5px stroke weight. Designed for clarity at small sizes, the set spans navigation, actions, and content categories.

📄 [DOWNLOAD ICONS](#)

Layouts & Margins.

Layouts & Margins.

To ensure balance and readability, we recommend using a 40px margin on all for sides of the layout.

Furthermore, we use a 12-column grid with a gutter space of 20px. This grid system is designed to be flexible and versatile.

Grid System.

This 12-column grid can be adapted across common layouts such as for social posts, print or videos. Here are examples of how the grid works for 1:1 and 9:16 aspect ratios.

Bringing Elements Together.

Align logo, text, image and graphics to the grid, and make sure that the recommended gutter space is maintained.

The graphics can go beyond the margin however it should not cross the gutter.

Not just backed,
built together

Bringing Elements Together.

Align logo, text, image and graphics to the grid, and make sure that the recommended gutter space is maintained.

Layout Don'ts.

These are some instances of violations which should be kept in mind while using our layout system.

❌ DON'T ROTATE TEXT TO BE VERTICAL

❌ DON'T RIGHT ALIGN TEXT

❌ DON'T SET MARGINS THAT ARE UNEVEN

❌ DON'T PLACE TEXT OR THE LOGO OUTSIDE THE MARGIN

Colour Palette.

Colour Palette.

Colour is an essential component of our brand and it is what makes a communication immediately recognisable as UIV. Our palette is a mix of bright, cool and neutral colours.

Primary Colours.

Refer to the colour values listed below for each hue in the palette. It is imperative to consistently apply the accurate colour mode and values according to the specific application type, ensuring uniform colour representation across all mediums.

Midnight Blue

Colour Profile: RGB 15, 43, 95
CMYK 84%, 55%, 0%, 63%
HEX #0F2B5F
PMS 19-3864 TCX Mazarine Blue

Pale Blue

Colour Profile: RGB 236, 247, 255
CMYK 7%, 3%, 0%, 0%
HEX #ECF7FF
PMS P 115-9 C

Lime Green

Colour Profile: RGB 216, 234, 138
CMYK 8, 0, 41, 8
HEX #D8EA8A
PMS 12-0549 TCX

Olor aut ea qui re velitibus aspedis secearum eiusmod tempor.

NO: JUSTIFIED

Setting Type Alignment.

Tracking (aka letter spacing) is dependent on both type size and weight. Rule of thumb is the heavier the weight and the larger the size, the tighter the tracking.

TOO TIGHT

Tracking -9% at 76px

We stay
the course

TOO LOOSE

Tracking 6% at 76px

We stay
the course

JUST RIGHT

Tracking -2% at 76px

We stay
the course

Setting Type Paragraph Leading.

Leading is the space between lines. The visual effect of leading should always be optically greater than the wordspacing, which should always be optically greater than the tracking. This will prevent words from being read out of order and keep the eye from jumping around the page.

Depending on the use case, there are three different leading scales available to ensure comfortable reading on body copy (more generous leading) and more efficient spacing on headings (tighter leading). Generally speaking, the larger the type size, the smaller the leading.

TOO TIGHT

Leading 100% at 16px

Ut optus illam, oditem et et dolorec tempore pudant minti bea sumquia
Vevo qua tiorumquos doluptatur alit, in rerovid esedis mo omnit,
esequia qui cusaecto do dolum, quam hillore coreseque conestiis Vevo.
Olor aut ea qui re velitibus aspedis secearum id mo ium evelitatio.
Ut optus illam, oditem et et dolorec tempore atlas pudant minti bea
sumquia tiorumquos doluptatur alit, in rerovid esedis mo omnit,
esequia qui cusaecto dolum, quam hillore coreseque conestiis Vevo.
Olor aut ea qui re velitibus aspedis secearum eiusmod tempor.

TOO LOOSE

Leading 150% at 16px

Ut optus illam, oditem et et dolorec tempore pudant minti bea sumquia
Vevo qua tiorumquos doluptatur alit, in rerovid esedis mo omnit,
esequia qui cusaecto do dolum, quam hillore coreseque conestiis Vevo.
Olor aut ea qui re velitibus aspedis secearum id mo ium evelitatio.
Ut optus illam, oditem et et dolorec tempore atlas pudant minti bea
sumquia tiorumquos doluptatur alit, in rerovid esedis mo omnit,
esequia qui cusaecto dolum, quam hillore coreseque conestiis Vevo.
Olor aut ea qui re velitibus aspedis secearum eiusmod tempor.

JUST RIGHT

Leading 120% at 16px

Setting Type Headline Leading.

Leading is the space between lines. The visual effect of leading should always be optically greater than the wordspacing, which should always be optically greater than the tracking. This will prevent words from being read out of order and keep the eye from jumping around the page.

The leading in headlines will also change as the size increases or decreases. Depending on the use case the general rule to be followed is that a tighter leading will be used when type sizes are bigger and loose leading will be used when type sizes are smaller to cater for readability.

*We have used a general formula to calculate a px value for the leading. In order to get the same multiply the percentage value by the point size of the text and divide that by hundred. The text on the left of the text is the indicator of the px values, for example, 119/115, where 119 is the px value of the type size and 115 is the px value of the leading.

108/108*

Lorem ipsum
sitamet
consectetur

DESIRED LEADING Leading 108 px (100%) at 108px

108/105*

Lorem ipsum
sitamet
consectetur

ACCEPTABLE LEADING Leading 105 px (97%) at 108px

Setting Type Examples.

Following are examples of kerning, tracking and leading all working together. Notice how the bigger the type is, the tighter the tracking and leading becomes relative to type size. These elements become looser with smaller type to maximise legibility.

SIZE 108px
LEADING 100%
TRACKING -2%

This is a title
example.

SIZE 32px
LEADING 100%
TRACKING -4%

This is a subtitle
example.

SIZE 16px
LEADING 120%
TRACKING 0%

This is a body copy example, lorem elit adipiscing elit, sed do eius mod tempor incididunt ut labore et dolore magna qua aliqua. Ut enim ad minim veniamquis ex nostrud exercitation ullamco.

SIZE 12px
LEADING 140%
TRACKING 0%

This is a small copy example, lorem elit adipiscing elit, sed do eius mod tempor incididunt ut labore et dolore magna qua aliqua. Ut enim ad minim veniamquis ex nostrud exercitation ullamco.

SIZE 10px; 16px
LEADING 120%
TRACKING 0%

THIS IS A CAPTION TITLE
THIS IS A CAPTION TITLE

Type Scale.

Our typography scale is based on a modular scale. This means, that every step in the scale is calculated by multiplying the step below with a ratio. Our type scale follows the Major Third (1:1.250) with a base of 1rem which is 16px. On the web, we round values to the nearest pixel for simplicity, and manually tweak the smallest step size for better legibility.

To calculate the values of the font sizes, multiply the number beside the 'rem' value by 16.

At the smallest point size (10px), we keep the text in All Caps to ensure readability and accessibilty.

186px 11.625rem

149px 9.312rem

119px 7.438rem

95px 5.938rem

76px 4.750rem

61px 3.812rem

49px 3.062rem

39px 2.438rem

31px 1.938rem

25px 1.562rem

20px 1.250rem

16px 1.000rem

13px 0.812rem

10px 0.625rem

Setting Type Don'ts.

There will undoubtedly be occasions where a type problem arises that isn't addressed in this toolkit. In these cases, refer to the guidelines as much as possible and try to find a solution that feels consistent with the overall brand. Below are some things that should always be avoided when setting type.

Lorem ipsum
dolor sitamet
consectetur

DO NOT USE AN ALTERNATIVE TYPEFACE

Lorem ipsum
dolor sitamet
consectetur

DO NOT LET ASCENDERS AND DESCENDERS TOUCH

Lorem ipsum
dolor sitamet
consectetur

DO NOT JUSTIFY TYPE VERTICALLY

Lorem ipsum
dolor sitamet
consectetur

DO NOT OUTLINE TYPOGRAPHY

Lorem ipsum
dolor sitamet
consectetur

DO NOT STRETCH OR SQUISH TYPE

Lorem ipsum
dolor sitamet
consectetur

DO NOT APPLY DROP SHADOW TO TYPE

Type Usage Don'ts.

There will undoubtedly be occasions where a type problem arises that isn't addressed in this toolkit. In these cases, refer to the guidelines as much as possible and try to find a solution that feels consistent with the overall brand. Below are some things that should always be avoided when setting type.

Imagery Guide.

Imagery Guide.

Our photography captures the human side of UIV, real founders, partners, and builders empowered by capital and collaboration.

People Focused interactions.

Photograph business meetings and networking moments in cool ambient light. Keep attire business casual. Focus on genuine interaction between two or more people; handshakes, conversations, deal moments.

People Close Ups.

Capture portrait-style headshots in office settings with natural light. Use blue-toned interiors as backgrounds. The person in focus should look relaxed and confident, no stiff or overly posed expressions.

People at Work.

Show people in collaborative meetings with laptops, set in modern offices with city views. Maintain cool blue tones throughout. Prioritise candid, engaged moments over staged group shots.

Industry Focused: Health & Life Sciences.

Select imagery that places viewers inside the work, close-up shots of researchers at microscopes, clinicians mid-consultation, and medical instruments in active use. Favour cool blue tones and clinical whites to reinforce precision and trust. Avoid posed group shots, instead seek candid moments that convey focus and expertise. Depth of field should be tight, drawing attention to the subject's hands or eyes.

Industry Focused: AI & Software.

Lead with the human side of technology, developers in flow, screens alive with code, interfaces in use. Cool, moody blue-to-dark gradients work well as ambient backgrounds. Include abstract tech textures (code overlays, light trails, digital interfaces) to suggest intelligence and scale. Avoid sterile stock cliches, prioritise atmosphere and authenticity over generic "person at laptop" setups.

Industry Focused: Fintech & Financial Services.

Choose imagery that communicates speed, security, and modern exchange, contactless payments, data visualisations, and hands interacting with devices. Maintain a cool, high-contrast palette with blue and electric accent tones. Avoid traditional banking imagery (suits, handshakes, floor traders), instead reflect the shift toward digital-first finance with close-crop, detail-driven compositions.

Industry Focused: Climate, Agri & Energy.

Show wide, open landscapes featuring wind farms, solar panels, and agricultural fields. Use natural daylight with vivid blues and greens. Mix industrial and natural elements to reflect the balance between human innovation and the environment.

Industry Focused: Deeptech & Hardware.

Focus on precision and craft, macro shots of circuit boards, engineers operating complex machinery, hands calibrating hardware. Cool blues and industrial neutrals anchor the palette. Convey the rigour behind the work through technical environments, safety gear, and close-up detail shots. Avoid over-glamorised tech aesthetics. Authenticity and process are the story.

Industry Focused: Consumer & Emerging Tech.

Reflect how people actually live with technology, casual, intimate moments of someone on their phone, hands on a keyboard, data scrolling across a screen. Warm-to-cool lighting transitions and a mix of teal and green digital overlays add energy. Keep compositions grounded and human-scale rather than aspirational or futuristic, emphasising accessibility and everyday relevance.

Brand Applications.

Brand Applications.

Across every format and platform, our brand shows up with consistency - translating our values of trust, transparency, and co-building into every asset we create.

Capital That Stays. Partnership That Builds.

Backing founders building the next generation of companies.

KNOW MORE >>

Supporting What Comes Next.

Long-term partners to deep tech and innovation-led companies.
